CASCINA SAN MARTINO

Category: Cantine
business description: For three generations, the land and vineyards have been cultivated using traditional methods, prioritizing manual labor to best select the grapes that are vinified with the same attention, care, and love as in times past. We have a strong connection to the land, and out of respect for the environment and biodiversity, we have not used any herbicides for 15 years.

With the help of the latest techniques, we pursue the goal of refining and ensuring the quality of the final product. The vineyard rewards the work, attention, and passion of those who daily monitor its growth and maturation, producing unique wines.
