La Commedia della Pentola

Category: Restaurants and taverns
business description: The harmonious body of the structure is derived from an old farmhouse that has been artfully renovated, with exposed stones and vaulted ceilings in solid bricks typical of the area. In the restaurant, each course is entrusted to the preparation and creativity of the chefs who put everything they need into the dishes: attention, tradition and authenticity, hence fresh and high quality ingredients. The menus vary because they are seasonal and are accompanied by refined wines and condiments of the highest quality.
